ngGirls

Free Angular 2 workshop for women
November 13, 2016, Google Campus Tel-Aviv

About ngGirls

ngGirls is an initiative that aims to introduce women to the world of technology and increase the diversity. Selected participants will be invited to a **one-day workshop** where, with the guidance of **volunteer mentors**, they will build and deploy their very first Web application with Angular 2. A few days later they will join the **Angular community** at AngularUP - Israel's international Angular conference.
The organization is inspired by Django Girls, and makes use of its open-source resources.

The participants

We aim mainly (but not exclusively) towards young women who:
- show commitment to contribute to the community
- make their first steps in web development
- would appreciate the financial aid - the free workshop and free conference ticket

Your contribution

Financial aid will be very much appreciated, as it will enable us purchase **conference tickets** for the participants. Next on the list of essentials is **lunch**.
Once the essentials are covered, the remaining budget will be used to make the event as awesome as possible, by providing **refreshments** and **swag**. As our budget increases, we will be able to reach further by offering **travel and accommodation** reimbursement to underprivileged participants.
As ngGirls is a non-profit organization, surplus funds will be used for **future events** and/or **donated** to other diversity-promoting non-profit organizations.

As a sponsor you will get:

Gold sponsor - $3000
- company logo on website
- company poster at workshop
- send email to attendees
- **5-minutes Lightning Talk**

Silver sponsor - $1500
- company logo on website
- company poster at workshop
- send email to attendees

Bronze sponsor - $800
- company logo on website

Why Angular 2?

- the newest technology
- built on top of the vast experience and success of Angular 1
- steep learning curve
- lots of (expected) users
- developed and supported by large companies
- targets various platforms: web, mobile...
- lots of opportunities to contribute

About the organizer

Shmuela Jacobs is a front-end developer and consultant mastering Angular at 500Tech, a leading Web Development company. During her academic studies (M.Sc. in Information Management Engineering and B.Sc. in Physics) she has combined her passions of coding and teaching as a software developer, teaching assistant, science museum guide, and researcher. Today she continues to enjoy these activities as a full-time developer, sharing her knowledge and experience in meetups and conferences around the world.

Shmuela is the founder of Angular AfterHours meetup group, which focuses on teaching Angular 2 through hands-on workshops and open-source contribution. She is a part of the organizing team of AngularJS-IL meetup (3800+ members) and a community volunteer in AngularUP conference.
